

Joint Stand Hydropower Innovation Pavilion at RENEXPO® HYDRO 26. - 28.11.2015

With a very high share of electricity production the hydropower constitutes in Europe an environmentally friendly backbone of electricity supply. In order to produce as much electricity as possible, an excellent technique is requested. The companies who aim such a technique unite innovation, economy as well as ecology.

The concept

We offer especially to innovative enterprises the chance to present during RENEXPO® PV their new developments or substantial improvements of products, processes or services. The aim of the innovation stand is to facilitate the innovative companies a cost-efficient marketing of their products and to make them a tangible experience for the public.

Your advantages

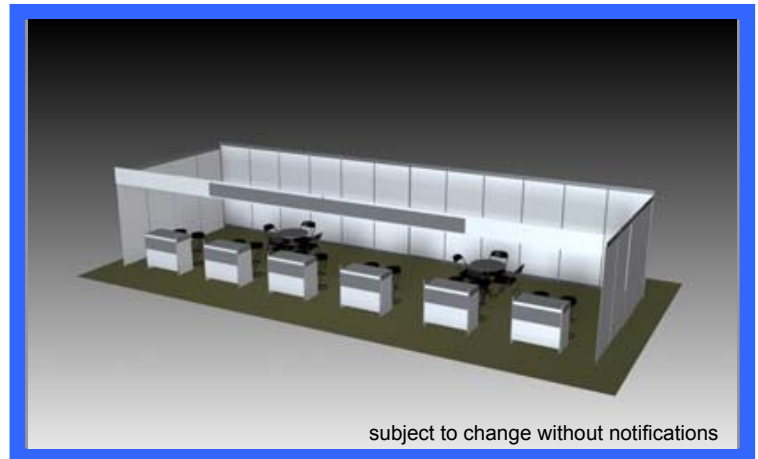

- ▶ With minimal efforts and low costs you get a representative appearance on the innovation space, where your products can be customized to a large public.
- ▶ Take advantage of the synergies of the stand space, the special attention of this innovative area and the possibility to interact with other participants and to establish new business contacts.
- ▶ A powerful network and new contact opportunities are available for you during the RENEXPO® PV.

Conference programme (extract)

- ▶ 7th International Small Hydropower Conference: Innovation and Efficiency
- ▶ 1st International Conference on Pump Storage Power
- ▶ Western Balkans Investors Workshop
- ▶ other conferences only in German
