

Guidelines for preparing abstracts of contributions to the Polish Hydropower Conference "Hydropower status and outlook in Poland and Europe"

Eminent Researcher

University of Everything
PO Box 20969
Penstock City
Investland

Proud Manufacturer

Best Turbine Company
Hydropower street 21
Turbine City
Hydroland

The abstracts of conference contributions will be printed in conference proceedings to be disseminated among the conference participants directly before the debate. Therefore, the authors are kindly requested to submit their abstracts in an electronic form till August 15th this year. The Organising Committee cannot guarantee publication of an abstract submitted after August 24th.

The abstract should give the reader general orientation in the paper scope and enable understanding of its main theses. Please, use this template and the MS Word or compatible editor when preparing your text. The document - including illustrations if any - should take no more than 2 A4 sheets with 25 mm margins at all sides. The *Times New Roman* font is to be used throughout whole the document. Each paragraph - except the paper title - is to be followed by a 6 point spacing.

The abstract should commence with the title printed with bold letters of 18 point height, separated with 18-point spacing from the top margin and the author (s) data. The names of authors should be printed using bold font of 11 point height in one or two columns. The names of authors should be followed by their affiliation printed with a font of 10 point height. Please, use one column (table cell) for different authors with the same affiliation. After leaving one empty line the abstract text is to be written down using the same font with justification to both sides. The figure and table captions if any should be written using a bold font of 9 point height, commencing with "Fig." or "Table".

After an empty line left beneath the abstract text the list of bibliographical references and biographical notes of the authors follow. The headings "References" and "Authors" are to be written down in a bold font of 11 point while 9 point font is to be used for bibliographical data and biographical notes themselves. Leaving one empty line above the headings is recommended. Reference to bibliographical items is made in the text using relevant numbers placed in square brackets.

In addition to the abstracts we desire publication of your presentation in form of a pdf file available from the RENEXPO website. Authors of selected contributions will be proposed publication of their full-length papers in ENERGETYKA WODNA quarterly or *Transaction of the Institute of Fluid-Flow Machinery* journal.
